

FMSAC - DOD relations

S&T File 70-B-511 (Job no.)

13 November 1963

General Carroll expressed concern at the lack of information about CIA external research in the S&T field. DOD/DIA inventory to be completed by the end of the year on DOD capabilities for missile-related intelligence and development of increased competence in this field. Responsibility for R&D remained with the Services but DIA has access to components and is chartered to task the Services for reports and information. ~~General Carroll has task authority to task the Services for reports and information.~~ General Carroll hopes appropriate mechanisms and procedures will be developed to coordinate CIA efforts with DIA efforts in this area.

(This excerpt from a memorandum by John Bross of telecon with Director/DIA (Gen. Carroll) was sent to DD/S&T for info.)
